Subject: Tree removal

Caution: [EXTERNAL EMAIL] This email originated from outside the company.

Hi!
I tried submitting this request through the architectural application, however it kept telling me there was a file name already there and to resubmit later. Hoping this email will suffice!

Im requesting removal of 3 trees on our property and a cluster of dead trees just over the property line of house 77. (Neighbor is aware and sharing cost). 1 blue spruce at front of house has an infection and is dying. Another tree at the back corner has previous Hoa approval from previous owner but was never removed and is now overhanging house. The other tree is dead and over the deck and house. These removals are intended to prevent further structural damage and preserve the safety and functionality of our property. Even with these changes, our lot will remain well above the 20% undisturbed natural vegetation requirement. Thank you for your consideration
