

Location of two (2) trees that are located too close to the house

<https://trees-energy-conservation.extension.org/what-is-a-safe-distance-to-keep-between-a-tree-and-my-house/>

SEPTEMBER 10, 2019 BY TREES-ENERGY-CONSERVATION

What is a safe distance to keep between a tree and my house?

The distance between your home and a tree planting should be determined by the mature width of the tree's canopy. Trees should be planted at least a distance of 1/2 of their mature canopy width from a home. For example, if a tree's canopy at maturity is 40 feet wide, it should be planted at least 20 feet from your home.

Large **trees**, up to 70 feet or more should be planted at least 20 feet **from** the home, medium-sized **trees** up to 70 feet tall, 15 feet **from** the home, and small **trees** 30 feet tall or less, 8 to 10 feet **from** the home.

Sturbridge Lakes Association

Architectural Change Application for Tree Removal

Short Form Application

Name:

Address: Number: Street: William Feather Drive ▾

Phone:

Email:

I want to remove trees.

On a lot survey mark location of ALL trees noting the ones you wish to remove and why. Also, lightly shade all areas of property left 'undisturbed' to show compliance with our 20% undisturbed natural vegetation per Article V, Section 1. (p) of the C & R's.

Using your digital camera, take a full size picture of your marked up lot survey and load it to your computer.

Select your lot survey picture to send (jpg/gif)(5MB max size) : No file chosen
